Name : _____ Grade : _____ Date : _____

1 . What is volume of sound?

_____

_____

2. What is pitch of sound?

_____

_____

3. Name the control variable in their investigation. Explain why it is the control variable.

_____

_____

_____

_____

4. What is the independent variable in their investigation? Explain why?

_____

_____

5. Complete the sentences about the pitch of the notes Sofia plays.
Use the words in the box.

lower	higher	slower	faster	low
longer	shorter	vibrations	high	

When Sofia covers fewer air holes with her fingers, it makes the column of air in the recorder _____ . This makes the air vibrate _____ and gives the sound a _____ pitch.

When Sofia covers more holes with her fingers, it makes the column of air in the recorder become _____ . This makes the air vibrate

6. How we hear? Use the words 'vibrations, 'travel' and 'air' in your sentence.

_____

_____

_____

7.

4 How will the pitch of the sound change if the guitar string is thicker?

_____

_____

Tighter string = Higher pitch.

Thicker string = Lower pitch.

Thinner string = Faster vibrations = Higher pitch.

1 Copy and complete these sentences by choosing the correct phrase:
The more tightly stretched the string, the higher-pitched/lower-pitched the note.
The thicker the string, the higher-pitched/lower-pitched the note.

2 Are the vibrations faster or slower when you tighten a string?

3 Are the vibrations faster or slower when you pluck a thinner string?

8. How solid particles are stay together? Make a sketch of particles

_____

9. How liquid particles are stay together? Make a sketch of particles.

_____

10. What is atmosphere?

_____

11. Air is a mixture of _____ gases.

12. What substances make the air polluted?

_____

_____

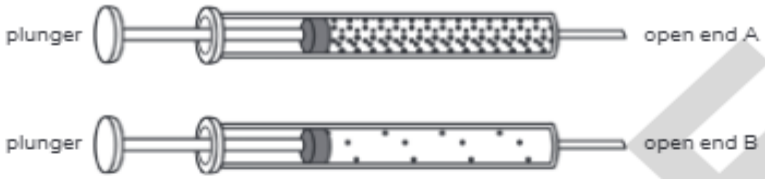

13. We breath in _____.

14. We breath out _____.

15. Solids, liquids and gases are the three _____ of matter.

16. _____ is a example of gas.

Look at the pictures of particles in the two syringes, A and B.

6 a Which syringe do you think contains water and which syringe contains air?

_____

b Explain your answer using the particle model.

_____

_____

_____

_____

7 If you hold your finger over the open end of the syringes, which plunger will be easier to push down? Use the particle model to explain why.

_____

_____

_____
